**Section 5: Fire Fighting Measures**

**General Info:** Use proper safety equipment. Can decompose to emit toxic carbon monoxide, carbon dioxide, and ruthenium tetroxide vapors.

**Extinguishing Method / Equipment:** Use water spray, foam, carbon dioxide (CO<sub>2</sub>) or medium for primary source.

**Hazardous Decomposition Info:** Firefighters should wear self-contained breathing apparatus and full protective gear. Hazardous decomposition products formed under fire conditions. Carbon dioxide, carbon monoxide, organic fumes, and ruthenium oxide

**Section 6: Accidental Release Measures**

**Personal precautions and procedures:** Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate respiratory protective equipment and clothing during clean-up. Avoid breathing dust. Ventilate area if easy to do so. Contact local authorities if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

**Containment Equipment and Procedures:** Large Spills: Contain actively spilling material if safe and easy to do so. Do not let product enter drains.

**Cleanup Procedures:** Contain spillage and then collect with an electrically protected vacuum cleaner or by wet brushing and place in container for disposal according to local regulations.

**Section 7: Handling and Storage**

**Safe Handling Precautions:** Do not handle until all safety precautions have been read and understood. Keep containers tightly closed. Ensure adequate ventilation. Avoid breathing dust. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Wear appropriate personal protective equipment and wash thoroughly after handling. Keep away from ignition sources.

**Recommendations for Storage:** Keep material in a tightly sealed container. Prolonged exposure to air and moisture will result in degradation of the product. Handle and store material under an inert atmosphere of nitrogen or argon.

**Incompatibilities:** Oxidizing agents, halogens and active metals

**Section 8: Exposure Control / Personal Protection**

---

**General / Engineering** Ventilation: Local Exhaust: Required in handling area**Controls:** Mechanical: Desirable to insure concentration of material below TLV/TWA levels  
Other: Closed Ventilation system - Dust (Laboratory Fume Hood)**Work Clothing:** Protective work clothing which covers skin and prevents exposures.**Eye/face protection:** Wear safety glasses with side shields or goggles or face shield.**Skin Protection:** Wear chemical resistant gloves.**Respiratory** Utilize organic vapor respirator if airborne levels are not maintained or if ventilation is inadequate.**Protection:** Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN(EU).**Additional Information:** Observe good chemical hygiene practices. Do not smoke or eat while using this product. Wash hands or exposed skin after using the product.**Section 9: Physical and Chemical Properties**
